

## URINARY INCONTINENCE

	<b>STRESS</b>	<b>URGE</b>	<b>OVERFLOW</b>
TYPE			
ETIOLOGY	<p>↓ Urethral sphincter tone, urethral hypermobility (prostate surgery → ↑ risk)</p>	<p>Detrusor hyperactivity (associated with UTI)</p>	<p>↓ Detrusor contractility, bladder outlet obstruction (eg, BPH)</p>
SXS	<p>↑ Abdominal pressure (eg, sneezing, coughing) → leakage</p>	<p>Sudden overwhelming urge to urinate (↑ frequency of small volumes of urine)</p>	<p>Incomplete emptying → persistent involuntary dribbling</p>
